

Extend Ethernet Signals Wirelessly with our Pre Configured Wireless Ethernet Bridge. *Zero Set Up, Secure, Quality Guaranteed*

Benefits

- **Zero Set-up**

Works right out of the box. Aim it, mount it and plug it in. That's it. The built-in sector antenna gives you 80 degrees of coverage so lining them up is easy, even if you don't have a clear line of sight.

- **High Speed**

At up to 150 Mbps, there are no bottlenecks or latency problems even with demanding applications like video.

- **Long Range**

Line-of-sight distances of up to 15 kilometres are possible. That's a lot of cable that you don't need to buy or install.

- **Secure**

Configured out-of-the box with WPA2, 128-bit security for highly secure point-to-point operation. No software setup required. Outdoor rated enclosure for hardware protection.

Applications

- Create a transparent, secure, high-speed link between remote stations and a central office
- Bridge two networks or hard-to-reach nodes together
- Connect remote devices (IP camera, or other) to a LAN
- Replace expensive cables that are prone to damage in harsh environments

Specifications

- Preconfigured with WPA2 128-bit security – user configurable to other standards
- Data rate: 150Mbps, max
- Distance: up to 15km line of sight
- Ethernet connectors: RJ45 – Second Ethernet port with power-sourcing PoE
- Power (8W): Includes (4) 24V PoE injector adapters - 2 for AC power, 2 for DC power
- Temperature Range: -30 to + 80°C
- Case: Outdoor, UV stable plastic
- Dimensions: 29.4 x 8.0 x 3.0 cm
- Mounting: Integrated pole mount (optional wall mount brackets sold separately)
